

Student Health Services

UCF Health Student Health Services is an outpatient facility that provides primary and limited specialty services to the UCF community. All services are private and confidential.

All registered UCF students can use our services regardless of health insurance coverage. In the event the Health Center is closed, our website provides a listing of afterhours providers in the area, as well as an afterhours nurse line.

The Health Center is located on the southeast side of campus near the Libra residence halls.

X-Ray & Laboratory

Primary Care Visits

Students are required to pay a state-mandated health fee each semester based on the number of credit hours enrolled. This fee entitles students to primary care visits with no out-of-pocket charge for the general (primary care) office visit, and provides discounts on diagnostic tests, various medical procedures and medications.

Insurance Information

Our primary care providers participate in Aetna, AvMed, Cigna, Florida Blue PPO & Blue Options, TRICARE and United Healthcare. If using out-of-network benefits, SHS will provide you with the proper documentation, and you will be responsible for self-filing a claim with your insurance company.

For students needing insurance, please visit our website at www.studenthealth.ucf.edu and click on "Insurance" to learn more about your options.

UCF Pharmacy

Located on the 1st floor of the Health Center, our pharmacy provides the products and convenience that you expect, tailored for the unique needs of our patients. We accept prescriptions from both our internal providers, as well as others outside in the community. Transferring your prescriptions from other pharmacies is easy to do, and we participate in over 100 different prescription plans. Visit our website to learn more.

Medication Disposal

Bring any unwanted medications to the secure Drug Take Back box located in the UCF Pharmacy or Student Union. The service is anonymous and accepts everything except liquids and creams. The drugs are then safely disposed of (incinerated).

Student Health Services

Our Services (some services may incur additional fees)

• Behavioral Health Clinic

• Clinical Dietitian:

Students can meet with a dietitian to address any clinical dietary needs such as weight loss, high blood pressure, diabetes and more. Referral is required.

• Psychiatry:

Our team of psychiatrists are available in our facility to assist in clinical issues regarding a student's mental health. We work closely with the Counseling Center. Referral is required.

• Substance Use Disorder Services

We provide treatment options to students who are struggling with addiction. We treat both substance use disorders as well as process addictions.

• Collegiate Recovery Community

Earn your degree while thriving in your recovery. We understand the challenges of being in recovery, and that's why fostering a sense of belonging, accomplishment, and accountability is important for students who choose to lead a sober lifestyle. We also ensure various support group meetings are held on campus.

• Dental Clinic

Located on the 2nd floor of the main Health Center, our Dental Center is a state-of-the-art facility offering preventative, restorative and cosmetic services. While there are no free services, prices are less than in the local community and are discounted for students. Services can be billed to PPO and Indemnity plans and insurance benefits will be based on the coverages obtained by the subscriber. A dental membership program is available for students, or they can take advantage of our low prices.

• Gynecological Services:

Our staff is devoted to providing comprehensive gynecological care, including well women's visits, STD testing, birth control options and more.

• Immunizations & Allergy Clinic:

UCF offers all required immunizations for students' registration as well as many others (such as travel vaccinations) at a discounted rate. Initial allergy testing is not provided, however we are able to store and administer patients existing antigens according to the allergist's orders.

• International Health:

Our International Health Clinic supports the wellness of both students traveling abroad and international students alike. Our providers specialize in travel-related education and culturally sensitive health care services.

• Travel Clinic:

Our Travel Clinic provides students with the latest information from the Centers for Disease Control. The Travel Clinic Provider will provide students with counseling on: tips for a safe and healthy trip; recommended and required vaccinations; risks associated with diseases and epidemics; food, water and health precautions; and what to include in a travel kit.

• Physical Therapy:

The UCF Physical Therapy Clinic is a faculty practice that provides physical therapy services to UCF and the local community. All care is provided by licensed physical therapists who are clinical experts and faculty members of the UCF Division of Physical Therapy.

• Primary Care:

All of our providers and nurses are fully licensed and certified. Our focus is on college health and the unique needs of this population.

• Sports Medicine:

Our Sports Medicine physicians focus is to prevent and treat sports or exercise-related injuries. Services include: in-office evaluation of acute and chronic musculoskeletal injuries.

• X-Ray & Laboratory:

In order to quickly diagnose, we offer both of these facilities in-house, and their services are comparable to community rates.
